

Images with star trails are captivating. They are also easy to accomplish and can be created almost anywhere, even in a light-polluted city or your own backyard. Creating a star trail image is a great way to get started in astrolandscape photography. It's a type of night photography that never gets old.

Digital cameras can see very well in the dark. You don't need a fast lens for star trails, unlike you would for astrola...

In case you missed it

I have been working on a new website and it is now live. The existing one will shut down on June 1st. The new website is silvanadellacamera.com. (Think Roseanne Roseannadanna). The new website is faster and easier to navigate. I do hope you

find it to be a better experience.

Kindly update any bookmarks accordingly. Thank you!

Those of you that have attended Zoom workshops that were recorded: As the old website will cease to exist, the links to the recordings will go with it. However, if you would like the recording, please let me know as I will give you access to it via a different platform. Please forward the email with the credentials you received for the workshop recording.

If you are in the area of Plymouth, MA on May 6th, I'd like to extend an invitation to the [Plymouth Center for the Arts Opening Reception and Awards Ceremony](#) on Saturday, May 6th from 4-6 pm. I am very honored that my image was accepted into the 2023 Thirteenth Annual Fine Art of Photography exhibit. I hope to see you there!

Upcoming Workshops

The Power of Stacking – Advanced Astrolandscape Post-Processing

Date: Monday, May 15th, 2023

Place: Online Workshop

Time: 6-9 pm

Bring your astrolandscape photography to another level. Learn how to stack Milky Way images and bring out detail in the night sky from your RAW images. Shooting high ISO is often dismissed and often frowned upon. Learn how stacking high ISO delivers super clean astro and astrolandscape image. Various post-processing techniques and software will be covered. Registrants will have access to the recorded post-processing Zoom class.

Essentials of Time-Lapse Photography Workshop

Part 1 – On location shoot

Date June 3rd

Place: Castle Island, Boston

Time: 10:00 am – 1:00 pm

Part 2 – Post-Processing

Date: June 5th

Place: 3-hour Interactive Online Session

Time: 6:00 pm – 9:00 pm

Digital photography has become a daily part of our lives. We consume and create photography almost constantly in our daily travels. A natural stepping stone to still photography is time-lapse, the art of capturing change over time. Only since the advent of modern digital cameras has time-lapse photography become so accessible. Time-lapse photography produces stunning images that give viewers a glimpse of the

world as they rarely see it. It is a technique that compresses timed capture over an interval of time into a concise creative rhythm. In this workshop, I will demonstrate how anyone could leverage this functionality with gear they already own. Class size: 6 attendees

[New England Foliage and Lighthouses Photo Tour](#)

Date: October 9-16, 2023

Maximum 8 attendees.

The New England Autumn is legendary and for good reason. As the late summer fades into memory, the colors of the trees begin their transformation into brilliant reds, oranges, and gold. Mornings are often misty, giving the landscape an ethereal quality. The clarity of the sky brings us opportunities for photographing the night sky. Early October is the peak time to experience fall color in New Hampshire. The red maple trees appear to intensify their colors against the mingling evergreens. The White Mountains offer rocky streams, hiking trails, and scenic vistas, with reflective lakes and ponds. Maine has a rugged coastline peppered with lighthouses. There is an abundance of beauty with every glance. Come join me on a photo tour in picturesque New England.
