Hello!

Thanks to those of you that joined me Monday night for the Power of Stacking workshop! I look forward to seeing your astrolandscape images! It looks like the word about the power of PlanIt is getting out there. More folks have asked me about it so I have added another [PlanIt Pro](#) workshop scheduled for September 9th. It's been fantastic watching folks learn how to use this powerful app. The latest blog post is all about night filters. On my old website, I had a blog post about these filters and have now written another. If you want to learn about them and whether they actually work, check out this [post](#). 📷

Clear skies!

### **Essentials of Time-Lapse Photography Workshop**

#### ***Part 1 – On location shoot***

Date June 3rd

Place: Castle Island, Boston

Time: 10:00 am – 1:00 pm

#### ***Part 2 – Post-Processing***

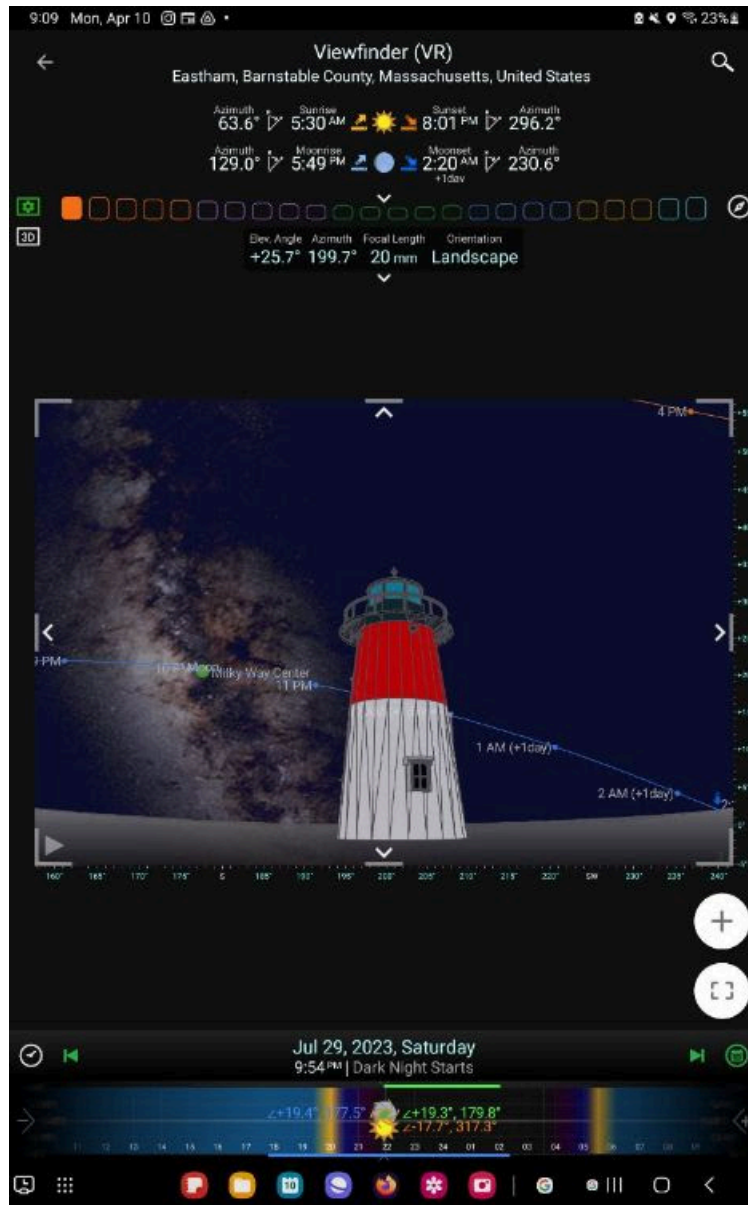

Date: June 5th

Place: 3-hour Interactive Online Session

Time: 6:00 pm – 9:00 pm

Digital photography has become a daily part of our lives. We consume and create photography almost constantly in our daily travels. A natural stepping stone to still photography is time-lapse, the art of capturing change over time. Only since the advent of modern digital cameras has time-lapse photography become so accessible. Time-lapse photography produces stunning images that give viewers a glimpse of the world as they rarely see it. It is a technique that compresses timed capture over an interval of time

into a concise creative rhythm. In this workshop, I will demonstrate how anyone could leverage this functionality with gear they already own. [Register for both sessions or just one.](#)

### PlanIt! Pro Workshop 📍

Date: Saturday, September 9th

Time: 12-4 PM EST

Essentials of PlanIt! PlanIt! is my favorite planning app. In my opinion, it is the best app bar none for planning Milky Way, Sunrises and Sunsets, Moonrises and Moonsets, and so much more. You might be using this app already but may not be utilizing its full capacity, or you have it on your mobile device and don't know what to do with it. This app is loaded full of photography and planning tools. Tap into the power of this fantastic tool. A must-have for any landscape or astrolandscape photographer. Registration is open.

**Date:** October 9-16, 2023  
Maximum 8 attendees.

The New England Autumn is legendary and for good reason. As the late summer fades into memory, the colors of the trees begin their transformation into brilliant reds, oranges, and gold. Mornings are often misty, giving the landscape an ethereal quality. The clarity of the sky brings us opportunities for photographing the night sky. Early October is the peak time to experience fall color in New Hampshire. The red maple trees appear to intensify their colors against the mingling evergreens. The White Mountains offer rocky streams, hiking trails, and scenic vistas, with reflective lakes and ponds. Maine has a rugged coastline peppered with lighthouses. There is an abundance of beauty with every glance. Come join me on a photo tour in picturesque New England.
