

Silvana Della Camera Photography

Hello!

I am excited to share that I have a new book on digital infrared photography that will be published this month. It covers all the twists and turns of infrared photography in depth, from filters and gear to post-processing workflow. The book will be available in two formats, downloadable eBook and also as a softcover book. [Both versions will be published this month. Follow this link to take a peek inside the eBook.](#)

December is the month of wonderful festive lights. The latest [blog](#) post will guide you on capturing these special moments using various creative methods.

The last workshop of the year is coming up on Saturday, December 16th on PlanIt! Pro. Although I utilize some features of PhotoPills, Planit! Pro is my go-to tool for pre-visualizing a scene and planning a shot. In my opinion, no other app compares in accuracy and expanse of built in tools. It is *the* app for planning the Milky Way, Sunrises and Sunsets, Moonrises and Moonsets, Star Trails, and so much more. This workshop will be held via Zoom and the recording will be available for registrants. [Learn more.](#)

Coming up in spring 2024, [Milky Way and Acadia National Park Photo Tour!](#) Winter isn't technically here yet, though it sure feels like it, but spring will be here before we know it. Time rips by so dang fast.

Wishing you all the best during this holiday season and always.

Clear skies!

Silvana

PlanIt! Pro Workshop

Learn how to use PlanIt!, the photographer's planning tool. Do you know how to quickly determine the location of the Moon or Sun as it rises over a lighthouse or specific building? Do you know when the Milky Way will be visible and where it will be relative to your location? Do you know how cloud cover will impact your photograph? Plan It! allows a photographer to measure twice, cut once, and achieve a successful capture.

December 16th

Photo Tour - Milky Way in Acadia National Park 2024

Milky Way photography, the splendor of the rugged coast of Maine and the charm of Bar Harbor...

 [Photo Tour - Milky Way in Acadia National Park 2024](#)

Join me in capturing the illuminescence of the night skies while immersing ourselves in the rugged beauty of Maine. We will be shooting in Acadia National Park and locations around Bar Harbor. Prepare yourself for an adventure-filled time with lots of photographic opportunities.

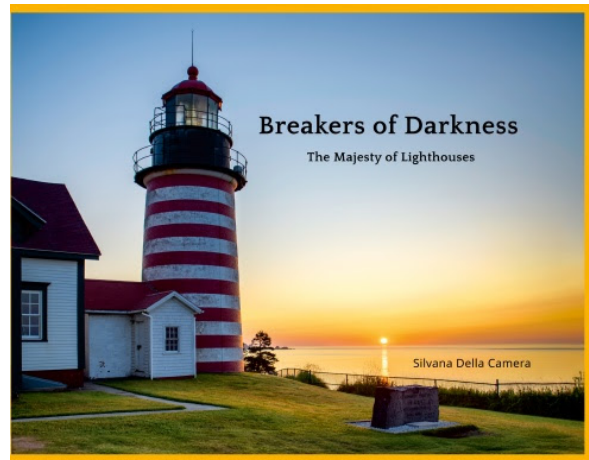

There is an abundance of beauty with every glance. Come join me on a photo tour in picturesque New England.

May 31- June 5, 2024

Breakers of Darkness - The Majesty of Lighthouses (Hardcover Edition)

This book encompasses many years of lighthouse photographs, mostly around New England. Lighthouses are a part of human history. Sadly, many are falling into disrepair as electronic navigation has now become the standard for traversing the seas. Private citizens and lighthouse organizations around the world are dedicated to preserving them and their stories. Through images and stories, inspiration lurches forth. This is a compendium of landmarks fixed in existence, yet seldom pondered.

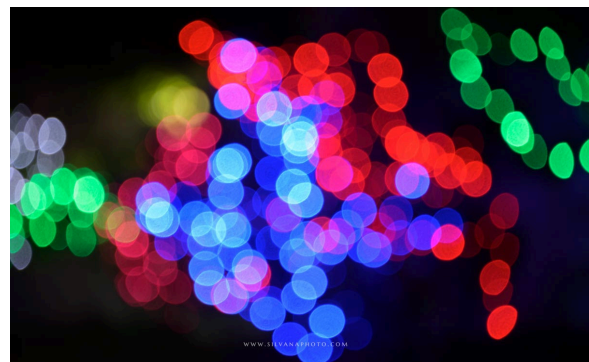

[Softcover edition available as well.](#)

\$58.00

How-to: Capture Enchanting December

December. The month of the year blazes with colorful lights as the length of daylight approaches its shortest duration. A perfect time to experiment with camera settings and get creative with your photography! You can take advantage of colorful lights close to home, visit the light displays in the city, visit places like La Salette Shrine or Tower Hill Botanical ...

Printing an Image makes it a Photograph

Think I am nuts? Maybe, but take a moment and ponder about it. Back in the day of film, once you processed your roll, you ended up with something physical. Whether it was prints or slides, you always had the physical product in your hand. In the digital world, we no longer have the physical end-product of photography unless we ...

How to: Photograph a Solar Eclipse

We have the “North American” eclipse in April 2024. The following how-to applies to any solar eclipse, not just the ones noted. It also applies to anytime you wish to photograph the Sun. The Sun is a wonderful object to photograph, eclipse or not. Safety. Safety. Safety Did I say safety? This ...

Gear Review - Variable Infrared Filter

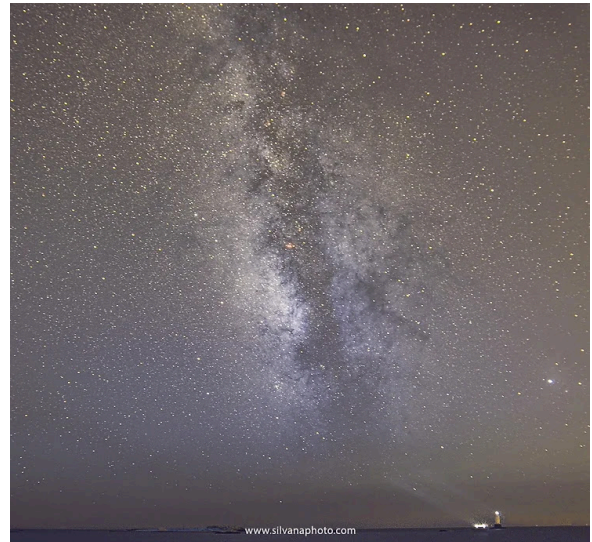

I have been playing with a variable infrared filter of late. I came across it on Amazon and it intrigued me. At first, I thought it was one of the many mislabeled items on Amazon, but I clicked on the item to see what it all about. This is a circular glass filter, with an infrared range of 530 nm ...

X-Ray Vision at Night

Infrared gives us X-ray vision. Well sort of. It allows us to see past our own narrow (pathetic) bandwidth. It is perfect for night photography. You may think this is an oxymoron. Infrared is normally viewed as photography under a blazing sun, perhaps peppered with some puffy clouds. A type of photography generally shot within the 10 am-2 pm window ...
