Silvana Della Camera Photography

Hello my friends,

Just a heads up that early bird pricing for the **7th Virtual Creative Conference** is ending in a few days. I am excited to be one of the speakers this year along with Hazel Meredith, Kathleen Clemmons, Andrew Kavanagh, Jim Nix, Vanelli, Phil Atiyeh, and Richard Lewis. There will be 13 hours of sessions full of photography goodness! I hope you can join us! The sessions will be recorded and will be available to all registrants for 60 days. Take advantage of the \$39 early bird pricing. It ends on January 31st!

On April 8th, we have the opportunity to **Photograph a Total Solar Eclipse**! These eclipses are very rare and require planning if you wish to photograph this amazing occurrence. The next total eclipse in North America will be in 2044. I have an upcoming session on the ins and outs of photographing a solar eclipse and the Sun in general. I will cover gear, time-lapse, composites, planning and most importantly, safety. The Sun is a great subject to photograph, any time you wish. This event will be held online and is **free**. If you have specific questions, just add them to the registration form. Those of you already registered, you will receive the Zoom invite on Wednesday, February 28th.

Come wallow for 5 days of camera eye candy in the rugged beauty of Downeast Maine on the **Milky Way and Acadia National Park Photo Tour**! Acadia National Park is a prime spot for Astro landscape photography thanks to its location. The park is situated on the largest

island in Maine and is rich with picturesque vistas prime for day and night photography. Although it was battered by the severe storm that hit New England a few weeks ago, as of this writing, all areas remain open.

Below, Minot Ledge Lighthouse after the fierce storm that hit New England a couple of weeks ago. It took me decades to get this shot. Although storms hit New England often, big waves don't often generate unless the storm is just right. The wind was incredibly fierce when I took this shot. I was on the beach for several hours, two hands tight on the tripod. On several occasions the wind almost took me and my tripod down. It was wild. This was one of those bucket list shots and I was so happy to (finally) capture this moment.

Clear skies,
Silvana

Photography Conference - 7th Virtual Creative
Conference

Join me at the 7th Virtual Creative Photography Conference, February 24 - 25, 2024.

Photographing a Solar Eclipse

This workshop is all about photographing a solar eclipse. We have the "North American" eclipse in April 2024. This session applies to any solar eclipse, not just the one in April 2024. It also applies to anytime you wish to photograph the Sun. The Sun is a wonderful object to photograph, eclipse or not.

Infrared photography has become much more accessible with the onset of digital cameras. Converting an old camera that's kicking around to infrared gives it new life, and adds another creative tool to your kit.

 [Sights Beyond the Spectrum - Digital Infrared Photography \(eBook\)](#)

This book will peel away the confusing layers of infrared shooting and processing in the digital darkroom. It will give you an understanding of what infrared is and how it renders a scene. Understanding the technical terms is key to achieving the type of infrared image you desire. This book will give you insights into the challenges of developing the strange, rather flat looking infrared images. [eBook](#) and [Hardcover](#).
