Silvana Della Camera Photography

Hello my friends,

I'm looking forward to seeing many of you at the **7th Virtual Creative Photography Conference** coming up the weekend after next. If you're looking for some creative photography to inspire you, you still have time to register for this creative conference. I am a speaker this year along with Hazel Meredith, Kathleen Clemmons, Andrew Kavanagh, Jim Nix, Vanelli, Phil Atiyeh, and Richard Lewis. There will be 13 hours of sessions full of photography goodness! I hope you can join us! The sessions will be recorded and will be available to all registrants for 60 days. Speaker notes for all the sessions will also be included! I will be presenting "ICM - More than just pretty".

On April 8th, we have the opportunity to **Photograph a Total Solar Eclipse**! These eclipses are very rare and require planning if you wish to photograph this amazing occurrence. The next total eclipse in North America will be in 2044. I have an upcoming session on the ins and outs of photographing a solar eclipse and the Sun in general. I will cover gear, time-lapse, composites, planning and most importantly, safety. The Sun is a great subject to photograph, any time you wish. This event will be held online and is **free**. If you have specific questions, just add them to the registration form. Those of you already registered, you will receive the Zoom invite on Wednesday, February 28th. You should have received an email with solar filter recommendations as well.

Come wallow for 5 days of camera eye candy in the rugged beauty of Downeast Maine on the [*Milky Way and Acadia National Park Photo Tour!*](#) Acadia National Park is a prime spot for Astro landscape photography thanks to its location. The park is situated on the largest island in Maine and is rich with picturesque vistas prime for day and night photography. Although it was battered by the severe storm that hit New England a few weeks ago, as of this writing, all areas continue to remain open.

If you belong to a camera club that is struggling to maintain a healthy headcount, please encourage your club's president/NECCC reps/other club leaders to attend tomorrow's "[*NECCC Keeping Clubs Active*](#)" meeting. Yours truly will be presenting ways to help clubs increase membership.

Below, an "Emerald City" Wizard of Oz look to the skyline of Boston using intentional camera movement.

Happy Valentine's Day. Celebrate at least one of the 7 loves today.

Eros – passionate love

Philia – friendship love

Storge – familial love

Agape – unconditional love

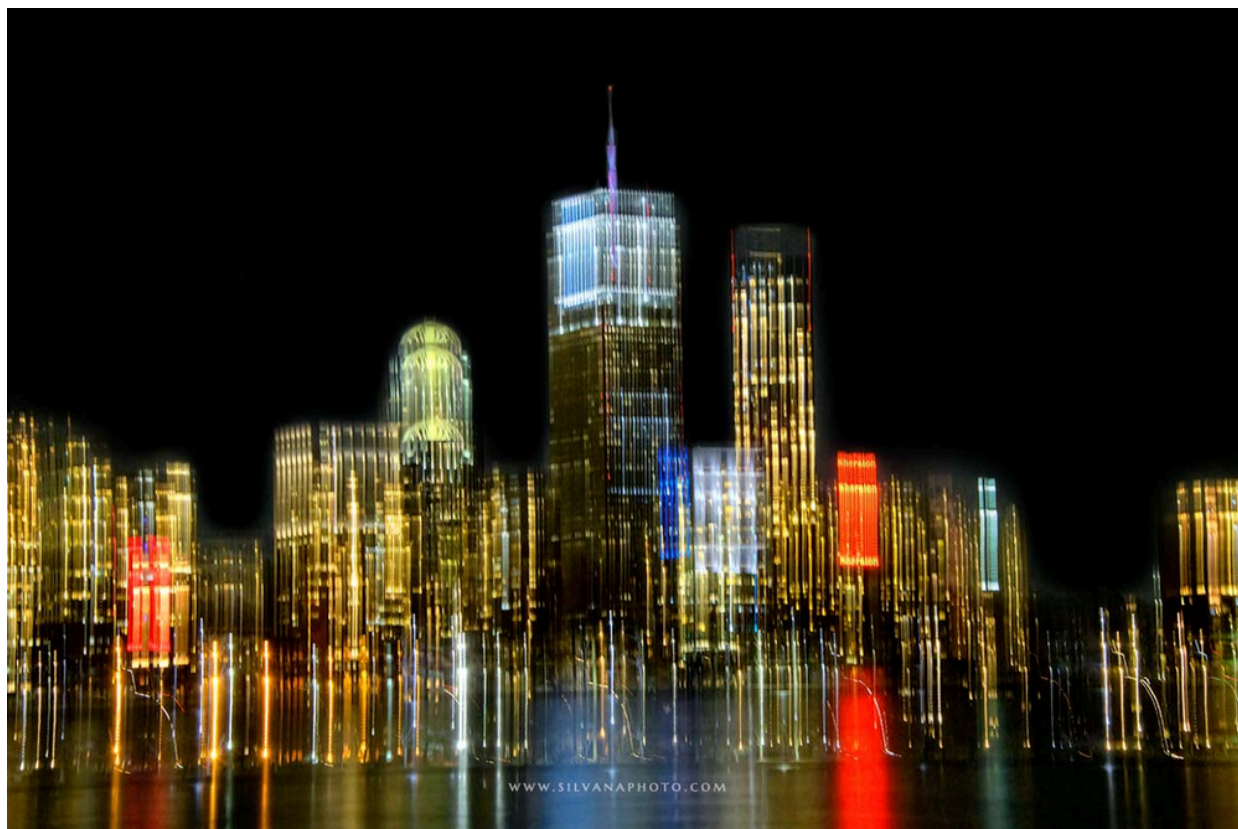

Ludus – playful love

Pragma – enduring love

Philautia – self love

Clear skies,

Silvana

Photographing a Solar Eclipse

This workshop is all about photographing a solar eclipse. We have the “North American” eclipse in April 2024. This session applies to any solar eclipse, not just the one in April 2024. It also applies to anytime you wish to photograph the Sun. The Sun is a wonderful object to photograph, eclipse or not.

[Register for free session.](#)

Photo Tour - Milky Way in Acadia National Park 2024

Milky Way photography, the splendor of the rugged coast of Maine and the charm of Bar Harbor...

 [Photo Tour - Milky Way in Acadia National Park 2024](#)

Join me in capturing the illuminescence of the night skies while immersing ourselves in the rugged beauty of Maine. We will be shooting in Acadia National Park and locations around Bar Harbor. Prepare yourself for an adventure-filled time with lots of photographic opportunities.

There is an abundance of beauty with every glance. Come join me on a photo tour in picturesque New England.

Photo Walk - Larz Anderson in Infrared

Larz Anderson Park, the largest park in Brookline, was formerly the Larz Anderson estate. It is composed of large expanses of lawn at the top of the hill, playing fields, and sweeping slopes. At the highest point, where the main house stood, there are exceptional views of Boston. The hill provides opportunities for active and passive recreation that are not available elsewhere in town. The grassy slopes provide a premier spot for sledding, watching sunsets, observing stars, kite flying and simply running on the slopes. There is a multitude of beautiful trees, a pond, a gazebo, and walkways to photograph. It's a great place to shoot infrared and explore different techniques using an infrared camera, including long exposure and ICM.

Date & Time: Friday, April 19, 2024
@ 10:00 am – 1:00 pm.

[Full Details](#)

Infrared photography has become much more accessible with the onset of digital cameras. Converting an old camera that's kicking around to infrared gives it new life and adds another creative tool to your kit.

 [Sights Beyond the Spectrum - Digital Infrared Photography \(eBook\)](#)

This book will peel away the confusing layers of infrared shooting and processing in the digital darkroom. It will give you an understanding of what infrared is and how it renders a scene. Understanding the technical terms is key to achieving the type of infrared image you desire. This book will give you insights into the challenges of developing the strange, rather flat looking infrared images. [eBook](#) and [Hardcover](#).
