## Silvana Della Camera Photography

---

Hello all,

Just a reminder that reasonably priced hotel rooms start diminishing faster than the light during blue hour by the end of March. If you are considering joining me on the [Milky Way Photo Tour in Acadia National Park](#), take this into consideration. There are a few openings left on this tour.

As always, feel free to ask any questions you may have about the expected experience.

Are you planning on photographing or observing the upcoming North American Eclipse on April 8th? If you missed the workshop, you can view the recording [here](#). The list of recommended solar filters can be found on the [workshop description](#) page.

We kicked off the 2024 photo walks this past weekend! What a blast! It was colder and windier than the forecast predicted (not really surprising...), but we had a lot of fun fumbling in the dark and photographing the beautiful lighthouse! Next month, another photo walk at a [lighthouse](#) and another in [infrared](#) too!

Clear skies,  
Silvana

[Always Look Back](#)

I often take my time going through my images. I shot this 7 years ago and just processed it. 7 years is a bit extreme in "taking my time," but there you have it. Anyway, I tend to see something in a photograph a long time after the initial moment of tripping the shutter. It happened on this one. A bit like a treasure hunt in the recesses of my hard drive. I guess the moral to the story is don't assume there isn't anything worth saving in the images you capture. Storage is cheap, don't immediately delete images unless they are misfires or blurry. You never know what magic you may be overlooking.

Nikon D810, 14-24mm @ 14mm. 17 frames.

Photo Tour - Milky Way in Acadia National Park 2024

There is an abundance of beauty with every glance. Come join me on a photo tour in picturesque New England. This tour is meticulously designed for flexing your photographic creativity while basking in Northeastern natural splendor. A bombardment of opportunities will lay themselves before you to create daytime long exposures, some ICM and in-camera multiple exposures to create impressionistic images of the scenes. All of this serves as the appetizer to capturing the main character of the tour, the timeless wonder of the night sky, the Milky Way.

Photo Tour - Milky Way in Acadia NP 2024

May 31 - June 5, 2024

## Photo Walk - Neds Point Lighthouse Sunset and Star Trails

Let's explore the beautiful Neds Point Lighthouse at night. We will start our walk at golden hour, we will photograph the sunset, continue exploring the changing light right through to darkness and also photograph star trails.

Saturday, April 13th, 2024

7 – 10 PM

\$80.00

## Photo Walk - Larz Anderson in Infrared

Larz Anderson Park, the largest park in Brookline, was formerly the Larz Anderson estate. It is composed of large expanses of lawn at the top of the hill, playing fields, and sweeping slopes. At the highest point, where the main house stood, there are exceptional views of Boston. The hill provides opportunities for active and passive recreation that are not available elsewhere in town. The grassy slopes provide a premier spot for sledding, watching sunsets, observing stars, kite flying and simply running on the slopes. There are a multitude of beautiful trees, a pond, a gazebo, and walkways to photograph. It's a great place to shoot infrared and explore different techniques using an infrared camera, including long exposure and ICM.

Friday, April 19, 2024

10:00 am – 1:00 pm.

\$80.00

## Essentials of Time-Lapse Photography Workshop

Digital photography has become a daily part of our lives. We consume and create photography almost constantly in our daily travels. A natural stepping stone to still photography is time-lapse, the art of capturing change over time. Only since the advent of modern digital cameras has time-lapse photography become so accessible. Time-lapse photography produces stunning images that give viewers a glimpse of the world as they rarely see it. It is a technique that compresses timed capture over an interval of time into a concise creative rhythm. In this workshop, I will demonstrate how anyone could leverage this functionality with gear they already own.

[Sights Beyond the Spectrum - Digital Infrared Photography \(eBook\)](#)

Infrared photography has become much more accessible with the onset of digital cameras. Converting an old camera that's kicking around to infrared gives it new life and adds another creative tool to your kit.

Sights Beyond the Spectrum - Digital Infrared Photography (eBook)

This book will peel away the confusing layers of infrared shooting and processing in the digital darkroom. It will give you an understanding of what infrared is and how it renders a scene. Understanding the technical terms is key to achieving the type of infrared image you desire. This book will give you insights into the challenges of developing the strange, rather flat looking infrared images. Learn how infrared allows you to see the world as many other fellow creatures are able to experience it naturally. View the world around us in a different wavelength through the power of your digital camera. This book is loaded with infrared photographs, providing the reader with a glimpse into the possibilities that can be achieved with a raw infrared image.

\$20.00

## How-to: Busting the Mental Blockage

What do you struggle with in your photography? Is it difficult to pick up your camera and dedicate time to explore and push your capabilities forward? Or are you in the other camp, photographing constantly but hitting the doldrums in your art? Like anything else we do, investing time is required to become proficient and with this, boredom can set in. If you are proficient in using your camera and it's not in your hands as often as it once was, it is time to reassess your photographic vision. Likewise, if you aren't proficient with your camera yet it is time to tackle the barriers.
