

## Silvana Della Camera Photography

---

Happy Friday! I hope your summer is going well. Two seconds of spring and right into the summer heat. *Yay us.*

The Milky Way & Acadia Photo Tour was such a fun time. We had beautifully clear skies so the emphasis was heavy on starlight! A big thanks to those of you who joined me!

I've recently launched a [Meetup Group](#) focusing on night and infrared photography. Our group will organize Meetups and also post events such as photo walks, workshops, and more. Meetups will be planned by myself and Ginny Castro, a fantastic photographer known from various camera clubs and Meetup groups. Many of our events will be free, offering a great opportunity to connect with other photography enthusiasts. Our first Meetup is scheduled for July 5th at a [carnival](#) in Franklin, MA. If you're new to Meetup, it's free to sign up. Join us!

Last call for the PlanIt! Pro Workshop happening tomorrow, Saturday, June 22nd, 12-4 pm! The session will be recorded and available to all registrants. Details below.

Finally, Milky Way Chases are coming up after the upcoming full Moon. Fingers crossed for good conditions! 📸

Clear skies,  
Silvana

Planit! Pro Workshop - June 22, 2024

Learn how to use PlanIt!, the photographer's planning tool. Do you know how to quickly determine the location of the Moon or Sun as it rises over a lighthouse or specific building? Do you know when the Milky Way will be visible and where it will be relative to your location? Do you know how cloud cover will impact your photograph? Plan It! allows a photographer to measure twice, cut once, and achieve a successful capture.

\$52.00

## Photo Walk - Neds Point Lighthouse Sunset and Star Trails - June 29th, 2024

Join me for an enchanting night-time adventure as we explore the captivating Neds Point Lighthouse. We'll begin our walk at golden hour, when the sun is low on the horizon, casting a warm and inviting glow over the surrounding landscape. We'll capture the breathtaking beauty of the sunset as it paints the sky with a palette of vivid colors, creating a stunning backdrop for our photographs.

As the day begins to fade into night, we'll continue our exploration, observing the changing light as it casts new shadows and illuminates different features of the lighthouse. Hopefully it will be clear and we will photograph the stars.

\$83.20 [3 spots open]

## Meetup - Carnival Lights - Summer Fun

Carnivals are a lot of fun to photograph. The bright colored lights are great to capture as they move. Rides feature all kinds of variety in color and movement and make for cool images. Photographing them requires a balance of shutter speed with the timing of the ride. When photographing several rides simultaneously (like the featured image), the challenge increases!
