

Silvana Della Camera Photography

Summer is in full swing. In New England, it means hot steamy days and hazy (sadly many cloudy) nights.

The ecstasy and the agony. I traveled to the Oregon coast last month. It is a place of amazing natural beauty, a photographer's delight! Massive sea stacks, powerful waves, countless waterfalls, snow-capped mountains, and astrolandscapes. A landscape photographer's dream location. I shot over 4 thousand images, including time-lapse sequences on this trip. Once I got back and started processing the images, I had a weird event occur on my computer. My entire Oregon folder was deleted, including the handful of images I got to process. Although I use BackBlaze to back up my data, this didn't save them. The images didn't get a chance to upload to the cloud before I lost them all. I will be publishing a post soon about the cause of the debacle and the steps I'm taking to prevent something like this in the future. Luckily, I was able to recover the raw files from the CFExpress cards. Scary stuff. The image below is from Oregon. I had exported this small JPEG before I lost the folder.

A big thanks to you who have joined my Meetup group "[Photography Beyond the Apparent](#)". Our first Meetup event was a blast. Check out the images folks shared from the [carnival in Franklin](#) on July 5th. The next [Meetup is a full Moon rise](#) this coming Sunday.

There are a few spots left for this Saturday's photo walk at [Beavertail Lighthouse](#). Next month, another photo walk at the beautiful [Scituate Light](#). More Milky Way Chases coming soon!

Clear skies!

Silvana

Photo Walk - Beavertail Lighthouse Sunset & Star Trails - July 20, 2024

Let's explore this beautiful lighthouse in Jamestown, Rhode Island. We will explore different methods of photographing the lighthouse including exposure stacking for light beams and hopefully star trails (cloud-dependent!).

Sunset is at 8:14 PM.

Photo Walk - Scituate Lighthouse Sunset and Star Trails - August 17th, 2024

Let's plan an evening walk to explore Scituate Lighthouse, which is the fifth-oldest lighthouse in New England and the eleventh-oldest in the United States. Her facelift is complete and she now has a brand new lantern room, windows, and fresh paint. We will begin our walk during the golden hour, take some pictures of the sunset, and continue exploring the changing light until it gets dark. We will hopefully photograph the stars.
