

Silvana Della Camera Photography

Hello my friends,

A new year, a clean journal to load with experiences. A time to set goals to sharpen the skills you have and also learn new techniques. Kicking off the first newsletter of 2024, I would like to give you a listing of upcoming photo walks, conferences, photo tours, workshops, and more that are scheduled for the first 6 months of this year.

February

Coming up in February, we kick off the year with a weekend-long conference. I am excited to be one of the speakers this year at the **7th Annual Virtual Creative Photography Conference** along with Hazel Meredith, Kathleen Clemmons, Andrew Kavanagh, Jim Nix, Vanelli, Phil Atiyeh, and Richard Lewis. There will be 13 hours of sessions full of photography goodness! I hope you can join us! Take advantage of early bird pricing.

March

On April 8th, we have the opportunity to **Photograph a Total Solar Eclipse**! These eclipses are rare and require planning if you wish to photograph this amazing occurrence. I have an upcoming session on the ins and outs of photographing a solar eclipse. This event will be held online and is free.

Join me on a [**Beavertail Lighthouse Sunset & Star Trails Photo Walk**](#) on March 16th. This is one of my favorite places to photograph the stars be it star trails or the Milky Way.

[*April*](#)

In April, an [**Infrared Photo Walk at Larz Anderson Park**](#). This park is the largest park in Brookline, MA and was once the Larz Anderson estate. It has a beautiful pond and gazebo and is a wonderful place to shoot infrared.

[*May/June*](#)

Ever wonder how time-lapse video is created? You own most (if not all) of the tools already. I have a morning of time-lapse photography at [**Castle Island, Boston**](#). There is a lot to point your camera on in Castle Island, from the planes landing and taking off from Logan Airport to the boat action in Boston Harbor and everything in between. This is the first of the two-part workshop on time-lapse photography. Signup for one part or both.

Come wallow for 5 days of camera eye candy in the rugged beauty of Downeast Maine on the [**Milky Way and Acadia National Park Photo Tour!**](#) Acadia National Park is a prime spot for Astro landscape photography thanks to its location. The park is situated on the largest island in Maine and is rich with picturesque vistas prime for day and night photography.

The Milky Way Chases will be restarting in May. These will be for [*groups*](#) and also [*private*](#) sessions. I am hoping (okay, praying hard) for better conditions than what we had in 2023.

So far, these events are on the calendar. I have more photo walks planned and an infrared workshop coming up and will be adding them to the schedule soon.

Clear skies,
Silvana

[A Look Back at 2023](#)

Another blink, another year gone. It seems like each year increases its speed exponentially thus increasing my panic of not jamming enough into the allotted 365 days. Time is infinite, my existence is not. 2023 had many moments of extremes, pure joy and of deep sadness and high frustration. I got to visit Death Valley for the very first time ...
