SILVANA DELLA CAMERA PHOTOGRAPHY

Coming up on Wednesday, February 12th we have a full Moon, also known as the Snow Moon, and rises at 5:26 PM. Full moons are a blast to photograph, especially during blue hour. Below, are a couple of Moon how-tos. The planet parade is still visible, so definitely keep enjoying the show! The next time the planets line up like this will be in 2040.

Three new events have been scheduled for 2025 with more to come! In March, we have a [light painting photo walk at Larz Anderson Park](#). This park is one of my favorite places to photograph. On this photo walk, we will create orbs and light art with light painting tools.

In May, we have a [lighthouse crawl on Cape Cod](#). May is a perfect time to capture the Milky Way; if we are lucky with clear skies, we will have the Milky Way as the backdrop to the lighthouses! At this time of year, the Cape is still quiet and thus less inundated with light pollution. It makes it an ideal time to chase the Milky Way! (a few spots are open).

Right after the lighthouse crawl on the Cape, there is another [Milky Way adventure in Acadia National Park](#). This is another of my favorite places to capture the stars. In October, we return for another photo tour, this time it revolves around the [colors of autumn](#). (a few spots left on the spring Acadia tour).

As I have done in the past, if you have camera gear that you are looking for or selling, send along your info. I am happy to include the information in these emails. Below, is a list of items for sale. Please contact the seller directly.

Clear skies,
Silvana

[Light Painting at Larz Anderson Park - March 22, 2025](#)

Let's go on a light painting adventure in this gorgeous park. The park boasts a variety of stunning trees, a pond, a gazebo, and several walkways that offer great photo opportunities. During this photo walk, we will be experimenting with light painting, creating orbs, and light art.

Registration is open.

Cape Cod Lighthouse Crawl - May 16-18, 2025

Cape Cod Lighthouse Crawl. We will focus our attention on the lights on the outer Cape, specifically Highland Light, Nauset Light, Chatham Light, the Three Sisters Lights, and the areas around them. We will visit these quintessential Massachusetts lighthouses, in areas with beautiful beaches and dunes. The focus is on these beauties at night when lighthouses ramp up their charm. May is when the Milky Way core rises before midnight providing us ideal shooting times.

Almost full.

How to: Create a Moonrise Timelapse

An image of a full Moon is enchanting. However, a moonrise timelapse leaves enchanting behind and gives the viewer a visceral kick in the head. A moonrise can be a challenge to photograph, especially when the Moon is full and rises after astronomical twilight and you've set your sights on a foreground object that is in a dark location. In ...

[How-to: Moon Photography - Like a Big Pizza Pie](#)

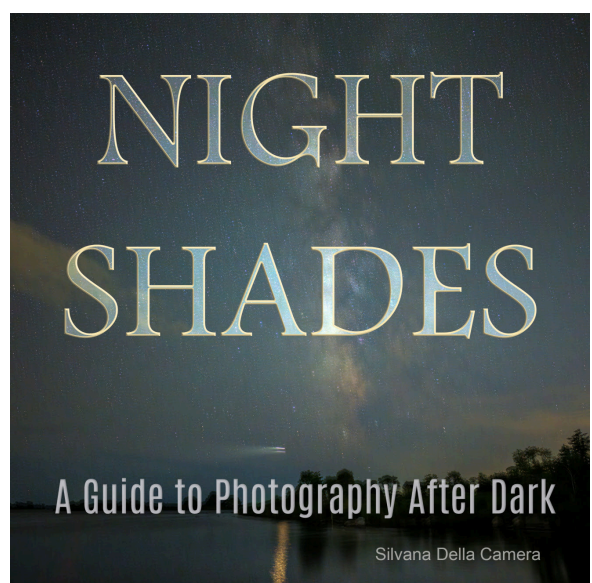

There is something magical about photographing the Moon. It's a perfect subject for a photographer. It's always there. It's always changing. For me, it never gets boring. I stalk the Moon every chance I get. The first time I photographed it with a big lens I gasped at the clarity of detail. Seeing the craters, mare, and craggy perimeter of ...
