SILVANA DELLA CAMERA PHOTOGRAPHY

It has been a while since my last newsletter, and spring has been quite busy. I've been traveling more than usual, so I've been somewhat off the grid. Recently, I had the opportunity to visit Alaska and soak in the rugged beauty of this amazing place, eyecandy maximus. We were on Cape Cod this past weekend for the [Cape Cod Lighthouse Crawl](#). A big thanks to all of you who joined me! It was a lot of wonderful photographic moments, camaraderie, and

laughs. We will be off to [Acadia National Park](#) in less than two weeks. Giddy up!

I am working on a new handbook that focuses on mastering one of my favorite tools, the [Benro Polaris Smart Tripod Head](#). If you own this tripod head, you know it is powerful but can be challenging to learn. This handbook is designed to help you maximize the potential of this incredible tool. The Benro Polaris offers functions like astro tracking, time-lapse, holy grail time-lapse, path-lapse, panoramas, and more. It may be compact, but it is quite powerful.

Past students of the [Benro Polaris Private Tutoring](#) workshop will receive a digital copy of the handbook upon its publication. The handbook is set to be released this summer, and details will be available soon.

Are you excited to chase stars? I certainly am! As we look forward to June, the Milky Way Chases are about to begin again. With the Milky Way core rising at a more convenient hour, you'll enjoy your night sky adventures without the need for extra coffee the next day. Details about the Milky Way workshops are below.

Clear skies!
