
Meetup Scheduled and Moments from Acadia NP

Sat, Jun 14, 2025 at 9:05 AM

SILVANA DELLA CAMERA PHOTOGRAPHY

We are back from Acadia National Park. It was a potpourri of weather conditions: heavy rains, thick fog, blue skies with puffy white clouds, and star-filled skies. There were high seas that produced amazing surf along the coast. The cherry on this delightful cake was the aurora! There were two aurora alerts issued over the span of two days, the first one ended up fizzling out, and the second one delivered. Here are a few captures from the tour, including a frame from the [time-lapse](#) from the night of the aurora. Learn how to photograph this amazing and beautiful rare occurrence ([link below](#)).

Next week currently looks promising for a Milky Way Chase. If conditions continue to look as good, I will send a notice a few days before with details about the workshop. Smoke will impact the visibility of stars so I am taking this factor into consideration.

On Sunday, June 22nd, we have a Meetup at Francis William Bird Park in Walpole. This is an infrared event, so bring your infrared camera! Full details and signup on [Meetup](#). Don't have a Meetup account? Membership is free, and so is this event!

More details regarding the Benro Polaris handbook are now available. [Link below](#).

Wishing all the Dads a Happy Father's Day.

Clear skies!

Silvana

Photography Workshop - Milky Way Chase Group Session (Location Shoot Only)

Have you ever considered delving into the captivating world of night photography? It's a unique and fascinating genre that requires a different approach compared to daytime photography. With the right techniques, you can capture breathtaking landscapes filled with stars and even photograph the awe-inspiring beauty of the Milky Way. Understanding how to manipulate your camera settings in low-light environments can open up a whole new realm of photographic possibilities and allow you to capture the elusive beauty of the night sky.

How to Photograph the Aurora

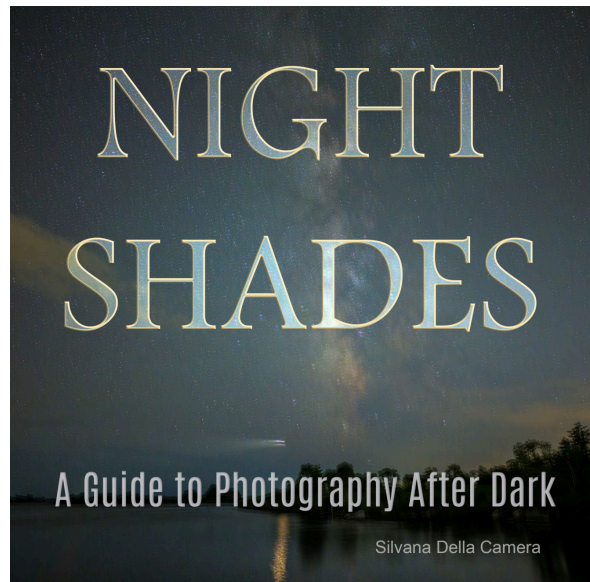

We are in a wonderful time to experience the aurora close to home. Learn how to plan and photograph this most beautiful and elusive event. Our Sun is currently increasing its activity, which is evident from the appearance of numerous sunspots on its surface, flares, and Coronal Mass Ejections (CMEs). These phenomena have a significant impact on Earth since everything ...
